## **ABSTRACT**

Customs maritime surveillance history has been influenced by numerous reports that often identified the need for management changes or infrastructure changes. This thesis analyses the evolution of the Australian Customs Services' role in Australia's maritime surveillance and border protection. The analysis framework is built around policy, financial and legal influences and developments.

The thesis recommends implementing a comprehensive harmonized strategy for early detection and effective responses.

This thesis argues that there are only two organisations capable of sustaining an effective maritime surveillance and enforcement capacity and they are the Australian Customs Service (Customs) and the Australian Defence Force (ADF). The suggestion that a single Australian coastguard organisation is another option is analysed in this thesis and discounted. The thesis looks at Customs evolution in maritime surveillance and border protection from pre-Federation to mid 2005 and forecasts some alternatives that could advance maritime surveillance and protection policy.

This thesis is important because competing world priorities, including terrorism *versus* trade, in turn, can lead to rapid policy competition for government funding, which can lead to poor policy choices.

## **Acknowledgements**

I would first and foremost like to thank my wife Sally, for her earnest support and enduring patience in completing this thesis. I would also like to thank my children James (15 years old) and Emily (13 years old) for their understanding and tolerance while I commandeered the computer and was often distracted at “family time”.

I would like to thank my supervisor, Dr Christopher Rahman for his support and guidance. The structure and cogency of this thesis should be attributed to his honest feedback and direction. Another person from the Centre for Maritime Policy deserving a special mention is Professor Martin Tsamenyi who both raised Customs’ maritime evolution questions and encouraged me to tackle the issue.

There are three other important acknowledgements. First, Marion Grant, Customs National Director Border Compliance & Enforcement, for her support, corrections, critical feedback and endorsement. Second, Keith Johnson, Superintendent Customs National Marine Unit for his experience, knowledge, insights, debates and access to NMU information. Third, Mark Zanker, Attorney General’s Department, Office of International Law for testing and guiding the concepts throughout this thesis.

Finally, I would like to make special mention and express my sincere gratitude to Cameron Moore. Together with positive criticism, I am genuinely grateful for your views and resource advice.
